

## Within the film “Snow White and the Huntsman”

### Title: Hidden in the Dark Forest

Context: As you have seen in the film, the Dark Forest is a dangerous place to be. You are the group of pursuers who want to find the princess hidden in the forest.

Task: What would you do? Imagine you do not have a huntsman at your disposal. Make also a list of the dangers of the forest and how you would avoid them.

### Title: Invade the kingdom

Context: Imagine you are the evil Queen Ravenna and you want to conquer a new kingdom. This kingdom is in the coast of France. The castle is surrounded by seven villages where the families of the soldiers live. In each village, there are from 60 to 120 inhabitants. You have at your disposal an army of 100 soldiers.

Task: Design a plan to conquer the kingdom. You have to take into account as many details as possible (remember that the kingdom will respond to your movements).

### Title: Defend the Kingdom

Context: This time you have to defend the kingdom from the queen’s army. She has at her disposal an army of 200 well-trained soldiers and 5 catapults.

Task: You have to design the structure of your kingdom to defend it from the attack of the Queen (e.g. place a guard tower in the limits of the kingdom so the guard will alert the soldiers faster)

### Title: Before and after the conquest

Context: At the beginning of the film you saw that the kingdom is full of green forests, flourishing lands and everything was prospering. After the arrival of the queen, the landscape changes.

Task: You have to describe the landscape before the arrival of the queen and after (200 words in total). When you finish doing the description draw the kingdom based on them so you can illustrate the differences better.
